Servlet

1. Design a login page to accept username, password and validate user
   Create a ArrayList to store user class objects (username,password)

   Accept username and password for 4 users through web.xml file.
   If username found then display message autherised user.
   Otherwise display message "unauthorized user".
2. Design a web application to calculate tax for given income accept, gender
   Investment amt, loan amt
   income=actual income-investment- (loanamt/12)
   If income is <=2.5 lakhs then no tax for female
   If income is <=2 lakhs then no tax for male
   Otherwise between 2.5 lakhs/2 lakhs ----- 6 lakhs then 20%
   Otherwise - 30%
3. Design application Similar to BookMyShow .com
4. Complete today's demo CategoryProductApp and DBConnectDemo to generate bill
   Using collections and using database connectivity(
